## PROJECTS

**Crypto Dashboard App**

* Crafted with expertise in React.js development, API integration, and user-centric design, our cryptocurrency dashboard app sets a new standard in digital asset management. By seamlessly merging live market data and portfolio tracking APIs, users experience real-time insights into their investments with unparalleled ease.

* The app's intuitive design ensures a seamless experience across all platforms, empowering both casual investors and seasoned traders alike. With a focus on optimized performance, users can trust in the reliability and efficiency of our app to stay ahead in the fast-paced world of cryptocurrencies. Whether you're monitoring market trends or managing your portfolio, our React-based dashboard delivers the tools and convenience you need to succeed in the crypto market.

**Weather App**

* Developed a Weather app leveraging the OpenWeatherMap API, ensuring users have access to up-to-date information including temperature, weather conditions, humidity, and wind speed.

* The integration of the OpenWeatherMap API enables seamless retrieval of accurate weather data, enhancing the app's functionality and reliability. With a user-friendly interface and comprehensive features, users can easily stay informed about current weather conditions in their area and plan their activities accordingly.

**Ecommerce Website**

* Created an Ecommerce website focusing on facilitating online product sales, this project incorporates a user-friendly shopping cart system to streamline the purchasing process. By integrating essential features such as product browsing, selection, and secure checkout, the platform ensures a seamless shopping experience for customers.

* From product discovery to order fulfillment, every aspect of the eCommerce journey is meticulously crafted to enhance user satisfaction and drive sales.
